Configuring ML Station 2

39 messages

Magnus <m.brantheim@gmail.com>

29 December 2025 at 11:45

To: waldek@gpucomputer.pl

Hi,

I am interested in this computer <https://www.gpucomputer.pl/product-page/stacja-ml-2-nvidia-rtx-6000-pro-blackwell-max-q-threadripper-7975wx>

I think it would be good to start with 2 GPUs to evaluate if I potentially need more.

So I like this version, but I am wondering if it can be configured to support 4 GPUs?

That way if needed I can just buy another GPU later.

I see the PSU is probably underpowered for 4 GPUs and it has a different motherboard.

Would this be possible and what would the cost be?

Thanks,
/Magnus

To: Magnus <m.brantheim@gmail.com>

Hello,

The setup you're describing can easily be expanded to include four RTX 6000 Pro Max-Q cards.

The power consumption (TDP) of each card is 300W, so a 2000W or

2500W power supply will suffice.

I recommend a 2500W FSP/Fortron Cannon Pro 2500W ATX 3.1 power supply.

Unfortunately, due to the significant increase in RAM prices, we have to raise the price. Currently, a setup with 256GB DDR5 ECC RDIMM and two RTX 6000 Pro Max-Q Workstation Edition cards costs 116,000 PLN including VAT.

Best regards,
waldek

Hi,

Alright thanks.

Can you give me a quote for a 3 GPU setup? One that could support 4 GPU eventually, so with improved PSU.

If there is a big price difference between 2000 and 2500W then I think a 2000 would probably do.

To: Magnus <m.brantheim@gmail.com>

HI

Configuration:

- AMD Ryzen Threadripper PRO 7965WX (liquid-cooled with Silverstone XE360-TR5)
- GIGABYTE MH53-G40 motherboard
- 256GB ECC DDR5 RAM 4800 (4x64GB DDR5 ECC RDIMMs)
- 3x NVIDIA RTX 6000 Pro Blackwell Max-Q 96GB VRAM per GPU (288GB total VRAM) 300W TDP
- 4TB PCIe 5.0 NVMe Samsung 990 Pro M2 hard drive
- FSP/Fortron CANNON PRO 2500W 80 Plus Platinum ATX 3.1 power supply
- Phanteks Pro2 server case

Price: PLN 155,000 including VAT

Local pickup, Poland, Krakow

What country are you from?

Enter your details and maybe shipping would be possible.

best regards,

Waldek

To: Magnus <m.brantheim@gmail.com>

Hi Magnus;

This greatly simplifies the processing of any orders.

Pickup in Krakow, courier shipping, and, since we're often in Warsaw, delivery to your office (or apartment) are also possible.

As I mentioned earlier, prices have been changing rapidly lately (unfortunately, they're actually increasing) and the offer price is valid for 3 to 5 days. Please let me know when you'd like to purchase.

Please also let me know if this would be a **business or personal purchase**.

The purchase process is as follows:

- 1. The customer orders the previously agreed-upon configuration via email.
- 2. We issue a proforma invoice (for a company or individual) and ask for payment (bank transfer).
- 3. After receiving payment, we issue a VAT invoice or, in the case of a private purchase, a cash register receipt.

Currently, this order can be completed within 14-16 business days (the parts need to be ordered and shipped; the rest is testing to ensure everything is working properly).

The equipment warranty is 36 months, and any service or repairs are performed on-site (in this case, in Warsaw).

Let me know if these terms meet your needs.

Best regards,

Waldek Lopata

Hi,

I can make the purchase now.

It would be a business purchase for my company.

Full company name: Magnus Brantheim Agentic DeFi

Short name: Agentic DeFi

NIP number: 7011256557

So it would be great with a VAT invoice.

Thanks,

Magnus

To: Magnus <m.brantheim@gmail.com>

Hi Magnus;

Is your company a VAT payer?

According to the Ministry of Finance's tool <https://podatki-arch.mf.gov.pl/wykaz-podatnikow-vat-wyszukiwarka/>

After entering your Tax Identification Number (NIP), you'll see a message that your company is not listed in the VAT Register (I've attached a screenshot), which means you don't pay VAT.

Does this mean you're exempt from VAT?

This applies if you're exempt from VAT if your revenue (sales value) did not exceed PLN 240,000 in the previous or current year. This is specified in Article 113, Section 1 of the VAT Act, which provides for exemption from VAT for taxpayers whose total taxable sales did not exceed PLN 240,000 in the previous tax year. The tax amount is not included in the sales value.

If so, we can issue an invoice without VAT deduction (proforma invoice attached).

If you have any questions, please ask your accountant to contact us by email at ksiegowosc@gpucomputer.pl or by phone at +48 883109779.

Best regards,
Waldek

Hi,

No, currently I am not VAT registered because I work for a company in Switzerland.

I was thinking I could get VAT registered for this (it is optional for me now). But it's probably better to do it this way to not complicate things.

I sent the payment from my personal bank account, attaching the transaction statement.

I work from home at Łucka 15 m 1601 00-842 Warszawa, so it would be great with delivery here.

Hi Magnus;

Thank you for the explanation, everything is clear.

As soon as the funds are transferred to our account, we will issue the appropriate invoice.

Please also provide your phone number.

When the workstation is ready, we will contact you and decide together whether to ship it via courier or deliver it ourselves to the provided address.

Thank you for purchasing the workstation.

Best regards,
Waldek

To: Magnus <m.brantheim@gmail.com>

Hi Magnus...;

I have a big problem...

Well, I don't know how it happened that I mistakenly stated a price of PLN 150,000 gross on the proforma invoice I sent you, even though it should have been PLN 155,000 gross, which you can verify in previous emails. I'm very sorry I was so careless and careless. It's my fault, but we need to fix this.

I'm sending a corrected proforma invoice to replace the incorrect one, and please provide the missing PLN 5,000.

I'll let you know when the kit is ready for delivery and whether it will be delivered by courier or by us.

As I wrote earlier in an email, this order can be completed within 14-16 business days (the parts need to be ordered and shipped; the rest is testing to ensure everything is working properly).

I sincerely apologize again for my mistake.

Best regards,
Waldek Łopata

To: Waldek Łopata <waldek@gpucomputer.pl>

Hi Waldek,

That's great.

I did some more research, so just in case you didn't order it yet. I think it would be a good idea to switch the case from Phantek to something like Fractal Design Define 7 XL.

This is because the Phantek case only supports 4 GPUs, but the CPU and motherboard could do 6.

So right now the case is a limitation for that.

I don't know if I would need 6 GPUs but it would be good to have the ability to upgrade easily.

If it is hard to change now then no worries.

To: Magnus <m.brantheim@gmail.com>

Hi Magnus;

We're waiting for the cards and memory to be delivered... it's a hot topic right now, and the shipment is a bit delayed, so the complete system will probably be delivered in February 2026.

BTW

I didn't receive your email from January 16, 2026 (it's not in my inbox or spam) in which you mentioned changing your case because you want to potentially upgrade to 6 cards, but I'll answer now:

You can't fit more than four RTX 6000 Pro Blackwell Max-q cards due to their thickness (the cards' thickness - each takes up two PCI-E slots).

The motherboard will only accommodate a maximum of four cards, each two slots wide.

Best regards,
waldek

9 February 2026 at
08:05

To: Magnus <m.brantheim@gmail.com>

Hi Magnus;

I apologize for keeping you waiting so long for information regarding your server.

There is currently a significant shortage of ECC RDIMM server memory and compute cards. To maintain the price we offered, we had to use the services of a supplier based in Asia. This supplier mistakenly misdirected the shipment, resulting in it being returned to the sender. The shipment was re-sent to us, and all of this combined resulted in such a long, unforeseen delivery delay.

The missing components should be here by Wednesday/Thursday, which means we will be delivering to your Warsaw address next Monday/Wednesday.

We sincerely apologize for the delay, and after speaking with my boss, I will offer you appropriate compensation as compensation.

If you have any questions, I remain at your disposal.

Waldek

12 February 2026 at 13:18

To: Waldek Łopata <waldek@gpucomputer.pl>

Hi Waldek,

That's great, thank you for that.

It was a bit worrying to wait with such a large investment.

If the missing components arrived do you have an estimation for which day you could deliver this?

Also I was thinking the GPUs are dual slot so that sets the cap at 4.

But with 2 PCIe 5.0 riser cables and an external open-air frame it might be possible to run 6 at once (which is the absolute max for the motherboard).

There would be a tiny hit on performance, depending on the cable length but I think this would be manageable.

For now I am just considering this for the future, but do you think this would be possible?

[Quoted text hidden]

Waldek Łopata <waldek@gpucomputer.pl>

12 February 2026 at
13:48

To: Magnus <m.brantheim@gmail.com>

Hi Magnus;

Your idea of using PCI 5.0 risers in a separate rack is doable, although I admit that it would be better if you decided to expand beyond four cards to water-cool all six of them.

The blocks are supplied by BYKSKI, e.g., <https://bykski.eu/products/enterprise-gpu-n-rtxpro6000-sr>, but of course, this requires an additional pump, radiator, and connectors.

Regarding delivery, I see that the missing components (memory and cards) are still outside Poland (delivery to the Polish Customs Office is scheduled for Friday/Monday, February 13/16, and for us in Krakow, Tuesday/Thursday, February 17/19), so we would arrive at your place

around Tuesday/Wednesday, February 24/25.

I apologize again for the delays; we will try to compensate for them with a discount.

Best regards,
waldek

2 March 2026 at 18:38

To: Waldek Łopata <waldek@gpucomputer.pl>

Ok,

In that case I accept the refund of 155,000 PLN.

However, you have held my funds for 49 days beyond the agreed delivery date, so I also expect statutory interest for delay (odsetki ustawowe za opóźnienie) of approximately 1,300–2,000 PLN per Art. 481 KC.

This is significantly less than my actual damages, including the increased market price of equivalent systems, so I consider this a very reasonable resolution.

Szanowni Państwo,

informuję, że w dniu dzisiejszym zostało do Państwa wysłane wezwanie przedsądowe do zapłaty listem poleconym za potwierdzeniem odbioru.

Wezwanie dotyczy zwrotu kwoty 155 000 PLN wraz z odsetkami ustawowymi za opóźnienie liczonymi od dnia 28 stycznia 2026 r. do dnia zapłaty.

Zgodnie z treścią wezwania, mają Państwo 7 dni od dnia jego doręczenia na dokonanie płatności.

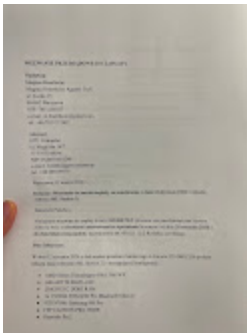

W przypadku braku zapłaty w wyznaczonym terminie, sprawa zostanie skierowana na drogę postępowania sądowego bez dodatkowego wezwania.

Z poważaniem,
Magnus Brantheim

Since you received the wezwanie przedsadowe I can file this with the court tomorrow.

You will then have to pay the court fee and bailiff fee on top of what you already owe.

The bailiff can seize your assets directly.

I would prefer to get paid sooner though.

Maybe if you dont have the full amount right now we could work something out.

If enough of it is paid right now, then I could delay filing it with the court.

I think that would be better for both of us.

Hi

I apologize for only writing now, but I'm working part-time. Our former supplier, a company from Hong Kong, declared bankruptcy, and as a result, the memory, cards, and processors we ordered and paid for—a lot of them—haven't arrived. We've filed for bankruptcy protection, but it's still ongoing. All is not lost, and I should know more next week.

I'm very sorry you've suffered such a significant loss.
